

## ROYAL PALM

*Royal Palm* was one of the few cars built for Pullman Standard Car Company that was constructed of stainless over stainless.

This luxury Pullman car was custom built for the Southern Crescent in the early 1950's. *Royal Palm* was modified into an ultra-luxury bedroom suite car for long distance travel.

*Royal Palm* contains five master bedroom suites, each with a separate toilet annex, and a separate all stainless steel shower. Each suite can be divided into two separate rooms for family or business travel. In addition, there is a separate double bedroom at the end of the car for the crew. At each end of the car is a large shower, dressing room, and sun lamp controls.

*Royal Palm* can sleep twenty-two persons, or seat thirty-two for day travel.
